### Why do we need this information?

Facilities need to show that they are committed to improving their environmental performance. This means that you can describe past achievements and will make future commitments.

### What do you need to do?

Refer to the Environmental Performance Table in the instructions to answer questions 1 and 2.

# Section C

*Tell us about your past achievements and future commitments.*

**Part 1** You must report past achievements for at least two environmental aspects, and you must choose these aspects from the Environmental Performance Table on pages 29-31 of the instructions. Please quantify each of your aspects using the units listed for that aspect in the Environmental PTrack Information Hotline at 1-888-339-PTRK.

**Note to small facilities:** If you are a small facility, you must report past achievements for only one environmental aspect.

### First achievement

1 What aspect have you selected from the Table on page 29-31?	Hazardous Solid Waste	
2 What units are you using to quantify this aspect? (See Table, page 29-31.)	lbs	
	PAST	CURRENT
3 List the past annual quantity of the aspect (from two years ago) and the current annual quantity of the aspect (from the most recent year for which you have data).	1465	644
4 What are the years for which you are reporting these quantities?	2000	2002
5 Estimate your past normalizing factor (Page 18 of the Instructions will help you calculate this.)	1.27	1.0
6 What is your normalizing factor based on (e.g., production, employment)?	production	
7 You reported an improvement in the quantity of the aspect in Question 3. How did you achieve this improvement?	Statistical Quality Control was used to eliminate duplication of some process analytical requirements. The majority of our facility's hazardous waste (both listed and characteristic) is spent laboratory reagents. These reagents are primarily organic solvents.	

## Section C, continued

### Second achievement

1 What aspect have you selected from the Table on page 29-31?		
2 What units are you using to quantify this aspect? (See Table, page 29-31.)		
	PAST	CURRENT
3 List the past annual quantity of the aspect (from two years ago) and the current annual quantity of the aspect (from the most recent year for which you have data).		
4 What are the years for which you are reporting these quantities?		
5 Estimate your past normalizing factor (Page 18 of the Instructions will help you calculate this.)		1.0
6 What is your normalizing factor based on (e.g., production, employment)?		
7 You reported an improvement in the quantity of the aspect in Question 3. How did you achieve this improvement?		

**Part 2** You must make future commitments for at least four environmental aspects, and you must choose these aspects from the Environmental Performance Table on pages 29-31 of the Instructions. The aspects you select for your future commitments should be related to the objectives and targets in your EMS. Where possible, they also should be identified as having a significant environmental impact in your EMS. No more than two of your aspects can be from the same environmental category. If you're not sure how your objectives and targets fit into our aspects or whether your aspects are significant, call the PTrack Information Hotline at 1-888-339-PTRK.

Once you have chosen your four environmental aspects, then fill in all the necessary information for these aspects in the tables on pages 7-10 of this form. Please quantify each of your aspects using the units listed for that aspect in the Environmental Performance Table. Each table that you must fill in corresponds to one of the environmental aspects you have chosen.

We will assume that your performance commitments are based on a constant production or employment level. If you would like to base your commitment on changing production or employment, please fill out optional questions 6a and 6b.

**Note to small facilities:** If you are a small facility, you must report future commitments for only two environmental aspects.
